Profile

I am a Computer Science student, I am passionate about computers and anything that relates to them. I developed an interest in web development, especially in the full-stack development field. I worked with interesting technologies and programming languages such as Node.js, Express.js, MongoDB with Mongoose, or with Node.js Driver, React, Javascript, Java. I mainly spend my day reading books about computer hardware/software, operating systems, networking, programming languages, and watching courses about technologies I'm Interested in them.

Education

01/2018 – present
Jeddah, Saudi Arabia

Computer Science | Bachelor of Science of Computer science King AbdulAziz University

- Relevant courses: Computer Organizational & Architectural, Programming Languages, Computer Graphics, Computer Networks.

My Projects

I have built really interesting projects and I plan on pushing them to Github soon, I will briefly describe here some of my projects beginning with a game that I built with the help of the Three.js library to create a 3D computer graphics and Cannon.js library to add collisions and movement for 3D objects in the 3D world, Three.js library was the abstraction level on top of WebGL, the second project was in networking, it was about peer-to-peer data transfer application using User Datagram Protocol, I wrote it using Python.

Technologies I am currently learning

as far as learning goes I would say that it's the thing that excites me the most, I am currently sharpening my skills in some really interesting technologies in the web development field, I am currently taking a course in React, Node.js, MongoDB with Node.js Driver.

Courses

- Modern HTML & CSS From The Beginning (Including Sass) (Udemy)
- Node.js API Masterclass With Express & MongoDB (Including Mongoose) (Udemy)

Skills

- PROGRAMMING LANGUAGES

Java Javascript Python

- LANGUAGES

English Arabic
